

MATRIX ADVISORS VALUE FUND, INC.

TICKER: MAVFX

Summary Prospectus | October 31, 2016

Before you invest, you may want to review the Matrix Advisors Value Fund's (the "Fund") Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information and other information about the Fund online at matrixadvisorsvaluefund.com/fund-application-and-documents/. You may also obtain this information at no cost by calling 1-866-209-1965 or by sending an e-mail request to cduffin@matrixassetadvisors.com. The Fund's Prospectus and Statement of Additional Information, both dated October 31, 2016, are incorporated by reference into this Summary Prospectus.

Investment Objective

The Fund seeks to achieve a total rate of return which is comprised of capital appreciation and current income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Annual fund operating expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.75%
Other Expenses	0.41%
Total Annual Fund Operating Expenses	1.16%
Less: Fee Waiver and/or Expense Reimbursement	-0.17%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽¹⁾	0.99%

⁽¹⁾ Matrix Asset Advisors, Inc. (the "Advisor"), the Fund's investment adviser, has contractually agreed to reduce its fees and/or pay Fund expenses (excluding acquired fund fees and expenses, leverage interest, taxes, brokerage commissions and extraordinary expenses) in order to limit the Fund's total annual fund operating expenses to 0.99% of the Fund's average net assets (the "Expense Cap"). The Expense Cap will remain in effect until at least October 31, 2017. The agreement may be terminated at any time, and without payment of any penalty, by the Fund's Board of Directors (the "Board of Directors") upon 60 days' written notice to the Advisor. The agreement may not be terminated by the Advisor without the consent of the Board of Directors. The Advisor is permitted, with Board approval, to be reimbursed for fee waivers and/or expense reimbursements made in the prior three years. This reimbursement may be requested if the aggregate amount actually paid by the Fund toward operating expenses for the fiscal year (taking into account the reimbursement) does not exceed the Expense Cap. Currently, the Advisor has agreed not to seek reimbursement of such fee waivers and/or expense reimbursements.

Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The expenses below reflect the Expense Cap for the first year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$101	\$352	\$622	\$1,394

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 15% of the average value of its portfolio.

Principal Investment Strategies

The Fund invests primarily in both dividend and non-dividend paying common stocks of U.S. companies that the Advisor believes are financially strong and meet specific valuation criteria using the principles of value investing based on Classic Valuation Analysis. Using valuation models, statistics such as earnings growth, dividend growth, return on equity and book value are analyzed versus their historical, current and projected levels to determine a company's "Intrinsic Value." The Fund invests primarily in large capitalization companies, which the Advisor defines as companies with minimum market capitalizations of \$2 billion at the time of purchase. Stocks will be sold when the Advisor believes they no longer represent value. The Fund may invest in any sector. At times, the Advisor may overweight the Fund's portfolio in one or more particular sectors, and/or underweight the Fund's portfolio or not invest in one or more particular sectors.

Principal Investment Risks

There is a risk that you could lose all or a portion of your investment in the Fund. The following are some of the principal risks that can affect the value of your investment:

Management Risk: The risk that the Advisor may fail to implement the Fund's investment strategies and meet its investment objective.

Market Risk: The market price of a security may fluctuate, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than it cost when originally purchased or less than it was worth at an earlier time.

Common Stock Risk: Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.

Large Capitalization Company Risk: Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative, smaller competitors. Also, large-capitalization companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.

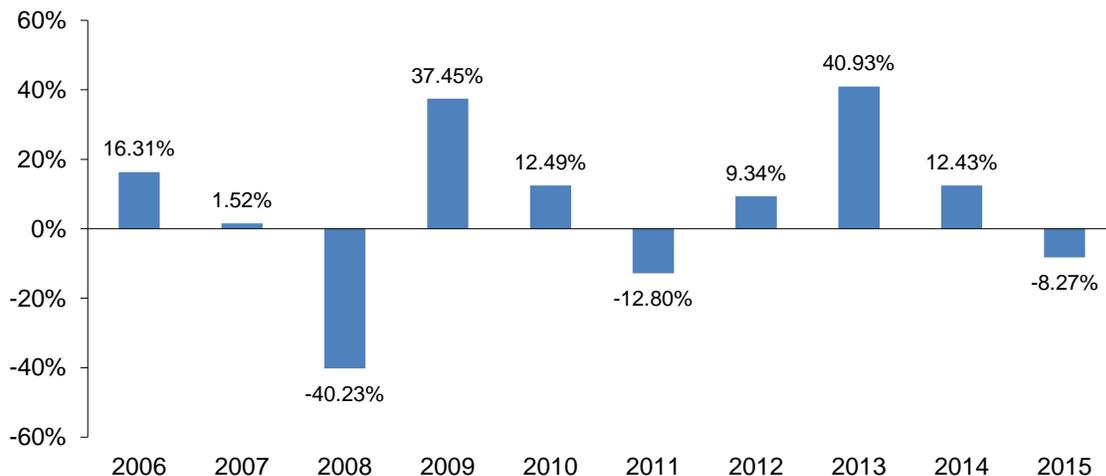

Sector Emphasis Risk: Investing a substantial portion of the Fund’s assets in related industries or sectors may have greater risks, because companies in these sectors may share common characteristics and may react similarly to market developments. In recent years, the Fund has concentrated its investments in the Financials sector, and as a result, it may be more susceptible to the particular risks that may affect companies in the Financials sector, including government regulations, economic conditions, credit rating downgrades, changes in interest rates and decreased liquidity in credit markets.

Value Strategy Risk: The stock of value companies can continue to be undervalued for long periods of time and not realize its expected value. The Advisor may not be able to accurately determine the “Intrinsic Value” of a company, resulting in the purchase of an overvalued security or premature sale of an undervalued company. Additionally, the market may use different criteria to determine a company’s value, which could have unexpected effects on a company’s performance and cause losses for the Fund.

Performance

The following performance information provides some indication of the risks of investing in the Fund. The bar chart below shows how the Fund’s total returns have varied from year to year. The table below shows how the Fund’s average annual total returns for 1-year, 5-year and 10-year periods compare with that of a broad-based market index. The Fund’s past performance (before and after taxes) is not necessarily an indication of how it will perform in the future. Updated performance information is available on the Fund’s website at www.matrixadvisorsvaluefund.com.

Calendar Year Total Returns*

* The Fund’s year-to-date return as of September 30, 2016 was 9.39%.

During the periods shown in the bar chart, the Fund’s highest quarterly return was 22.10% for the quarter ended June 30, 2009, and the lowest quarterly return was -26.31% for the quarter ended December 31, 2008.

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In certain cases, the figure representing "Return after taxes on distributions and sale of fund shares" may be higher than other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

Average Annual Total Returns as of December 31, 2015

	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
Matrix Advisors Value Fund			
Return before taxes	(8.27)%	6.74%	4.22%
Return after taxes on distributions	(8.61)%	6.46%	3.67%
Return after taxes on distributions and sale of fund shares	(4.41)%	5.30%	3.46%
S&P 500 [®] Index (reflects no deduction for fees, expenses or taxes)	1.38%	12.57%	7.31%

Purchase and Sale of Fund Shares

You may purchase or redeem Fund shares on any business day by written request via mail (Matrix Advisors Value Fund, Inc., c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701), by wire transfer, by telephone at 1-866-209-1965, or through a financial intermediary. The minimum initial and subsequent investment amounts are shown in the table below.

Minimum Investments

	To Open Your Account	To Add to Your Account
Regular Account	\$1,000	\$100
Retirement Account	\$500	\$100
Automatic Investment Plan	\$500	\$100

Tax Information

The Fund's distributions are taxed as ordinary income or long-term capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case you may be subject to federal income tax upon withdrawal from such tax-deferred arrangement.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
