

FUND GOALS

- Invest in quality companies at a significant discount to their intrinsic value, providing opportunity to deliver strong results over time as solid managements drive both growth in value and reduction in the discount.
- Seek to excel in Value-driven markets, and to outperform the benchmark on average over time.
- Outperform the benchmark in up markets.

INVESTMENT GUIDELINES

- Purchase stocks at a significant discount to our proprietary estimate of intrinsic value
- Strong financial position
- Prefer better companies in better industries
- Company management has a feasible action plan in place to resolve real or perceived problem
- Primarily Large Cap stocks
- Typically, no more than 4% (at cost) in any one stock and no more than 15% (at cost) in any one industry

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data to the most recent month end may be obtained by calling (800) 366-6223 or visiting our website. Performance figures reflect fee waivers in effect; in the absence of fee waivers, total returns would be lower.

QUARTERLY HIGHLIGHTS

- The Matrix Advisors Value Fund portfolio (MAVFX) sold off in Q2 in a market that continued to penalize last year's best performers, of which we had many. For the quarter, and the year-to-date through June 30, the portfolio trailed the Russell 1000 Value Index.
- We were very active during this period of market volatility, selling and scaling out of positions into price strength and starting new positions or filling out existing holdings during selloffs. We also engaged in select swaps aimed at upgrading the quality and upside of the portfolio.
- Looking ahead, we think investors are too negative about the economic outlook, inflation and the stock market. We are finding many good investment ideas in high quality companies and historically that has provided outsized returns for our portfolio in subsequent periods. We expect the stock market and our portfolio to end the year well above current levels. The portfolio's holdings are operating at a very high level with strong earnings and we believe it is very attractively valued.
